A Message from the PRESIDENT

DABC Convention - September 13-16, 2017
River Rock Casino Resort, Richmond

The DABC is excited to host this year's convention at the River Rock Casino Resort in Richmond. This is our second year here and we are looking forward to seeing you over this 4-day event.

We have opted to continue having the convention at the River Rock in Richmond as it was such a success last year. Not only was it easily accessible for many, but the convention facilities were fantastic and we are developing a solid relationship with the hotel, allowing us to build on the success of last year's convention.

We have added an extra day of continuing education and have an incredible line up of speakers on a wide variety of topics.

We also have other fun events planned throughout the four days. Our annual golf tournament on Wednesday is being held at the beautiful McCleery Golf Course in Vancouver. On Wednesday evening, please join us back at River Rock for our Welcome BBQ. This is a western-themed BBQ that will be held outside (weather permitting). Come have a ride on the mechanical bull!!! Thursday evening brings us the always fun 80's-themed hospitality night. The Gala dinner on Friday will be a Casino Royale theme. Dinner, music and a variety of casino games will be enjoyed by all! The trade show on Saturday will highlight a large range of products and services that are available to us.

We look forward to seeing you in September!

Gary Sallaway, DD
President

DABC Annual Golf Tournament 2017

DABC Annual Golf Tournament 2017
McCleery Golf Course
Wednesday Sept 13th
Start Time 10:00am

Can't believe it's already that time of year again! We wanted to bring a few things to your attention that will be a little different from the past few years.

First off, it's on a Wednesday!!!! This enables the DABC to provide even more education at the convention. Secondly, the most frequent comment about our golf tournaments in the past has been the price. With some incredible help from our tournament sponsors, our green fees will be only \$90.00 plus GST. This includes golf cart, lunch, and a ton of sweet prizes.

Please note, you will be responsible for arranging your own transportation. If you are planning to take a taxi, please let Alex or Kore know this ahead of time and we will be more than happy to have one ready for the morning of the tournament.

The evening western-themed BBQ will be back at the River Rock Casino after golf. It's always a very fun event so hope to see you there!

Any questions about the tournament contact Kore Connolly 250-372-3011 or koreconnolly@gmail.com.

See you in Sept!

THURSDAY, SEPTEMBER 14TH

8:30 am – 4:30 pm – Lillooet Room
CPR/AED Level C Training

Outline: This course provides the skills needed to recognize and respond to cardiovascular emergencies and choking for adults, children, and babies. It also includes how to perform rescue breathing. It includes using an automated external defibrillator (AED), also known as the 'shock machine'. Upon completing the course successfully, participants will receive: 3 Year Certification in CPR / AED C and the latest Canadian Red Cross or Lifesaving Society CPR / AED Manual.

9:00 am – 11:00 am – Fraser Room
Zahn Canada - Digital Denture Capabilities with Amann Girrback

Speaker: Maurice "Mo" Whitlock, CDT, TE, Product Specialist, Amann Girrback North America

Outline: Zahn Canada, a division of Henry Schein Canada, is the exclusive national distribution partner of Amann Girrback. In this presentation, we will outline the overall capabilities of the Amann Girrback In-House CAD/CAM system, opportunities to expand your current offerings as a lab using the Amann Girrback modular equipment and materials, as well as a particular focus on the digital denture solutions to fit the needs of Canadian Denturists.

Bio: Mo has over 23 years' experience as a dental laboratory technician. Mo served over 20 years in the United States Air Force as a lab tech. As a CDT, Mo has used his comprehensive lab knowledge as a lab manager, trainer, lecturer and technical support specialist. In the last ten years, Mo

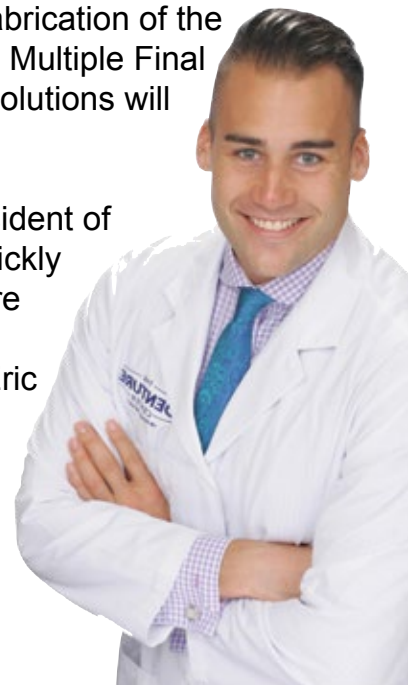

Continuing EDUCATION

has specialized in CAD/CAM technology and is well versed on numerous CAD/CAM systems. He received his A.A. in Dental Laboratory Technology from the Community College of the Air Force and his A.A. in Medical Sciences from Cowley College. Mo is employed by Amann Girrback North America as a product specialist.

9:30 am – 11:30 am – Thompson Room
Nobel Biocare - All On Teeth Solutions
Speaker: Eric D. Kukucka, DD

Outline: This presentation will discuss various aspects of full arch rehabilitation for both the terminal dentition patient and the edentulous patient with the all on teeth solution. Multiple case presentations will be overviewed. Case selection (treatment planning diagnostics with CBCT diagnostic in conjunction with Nobel clinician as well as proper clinic photographs). Various implants and their connections (internal, external which is better and why?); multiunit abutments and how they work; abutment level impression techniques; and a start-to-finish, step-by-step all on 4 teeth in a day conversion, from initial denture tooth set up to the immediate provisionalisation to the fabrication of the final definitive prosthesis. Multiple Final definitive final prosthetic solutions will also be presented.

Bio: Eric Kukucka is President of The Denture Center, a quickly growing network of denture clinics in Ontario. Eric currently owns 5 clinics. Eric graduated from George Brown College of Applied Arts & Technology with Dean's List Honours in

THURSDAY, SEPTEMBER 14TH

2010. He was named Valedictorian of the Centre for Health Sciences. Today, Eric is a successful practicing denturist and emergent entrepreneur who is already established as a consultant and key opinion leader for Ivoclar Vivadent as well as a key opinion leader for Nobel Biocare, top-of-mind companies in the global dental materials manufacturing and dental implant industry. Eric is a prominent sales strategist and advocate for marketing best practices, and creating high quality removable, fixed, and fixed detachable implant prosthetic restorations. Eric has been published multiple times and lectures extensively in North America as he strives to build great relationships within the dental community.

1:30 pm – 3:30 pm – Fraser Room
SEPPP - Building your Retirement through the Self Employed Pension Plan
Speakers: Michael Byrne, Founder/CEO and Mark Friesen, CA/Chief Operating Officer

Outline: As incorporated individuals or shareholders in their businesses, denturists may have the belief that they may not have access to pension plans that provide predictable retirement income similar to large corporate or government pension plans. This is actually a misconception, as there is a product called a Self Employed Personalized Pension Plan (SEPPP) that utilizes a government-created instrument (similar to an RRSP), that enables you to do implement exactly that type of pension plan. That said, the implementation and administration of these pension plans can be daunting for the individual or advisor who does not fully understand how they work and the elements needed to implement these plans. Self Employed Personalized Pension Plan Corp. (“SEPPP”) is an organization founded on the belief that entrepreneurs and incorporated professionals should have easy

Continuing EDUCATION

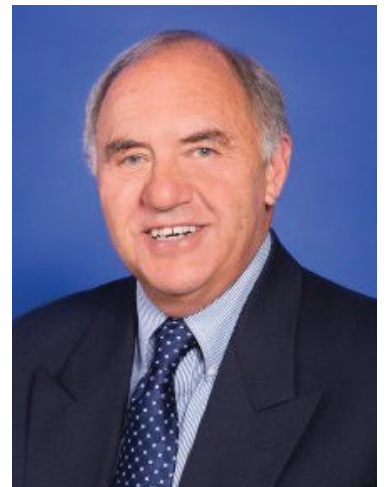

access to an institutional-style pension plan that provides that assured retirement income, as well as tremendous tax savings. SEPPP has unique expertise in the implementation and administration of these Individual Pension Plans. SEPPP’s product is particularly relevant given the recent tax mandates and proposed changes by the Federal Government to make it more difficult for professionals to maintain investments in their corporations.

You will learn:

- How to increase tax deductible contributions to your retirement plan
- The inner workings of an Individual Pension Plan (IPP)
- What characteristics define the individual who is a good candidate for an IPP?
- Common misunderstandings of an IPP.
- How does SEPPP make Individual Pension Plans happen?
- Strategic application of the IPP, including a discussion **of recent** tax changes.
- How to bulletproof your retirement plan through SEPPP

Bios:

Michael Byrne - Founder and Chief Executive Officer. Michael’s passion is to help business owners find the right solution to meet their needs. Michael combines this passion with his unique perspective based on over 40 years of business experience as an entrepreneur, financial advisor, insurance specialist,

THURSDAY, SEPTEMBER 14TH

skilled salesperson, accomplished trainer and more. Michael's experience in the financial industry includes holding designations of Chartered Life Underwriter, Certified Financial Planner, Canadian Securities License, Mutual Funds License, and Exempt Market Registration. As an exceptional relationship-builder, Michael has the ability to bring together successful and qualified individuals to meet the needs of an opportunity such as SEPPP. Michael is also a successful philanthropist, proud and patient grandfather and husband, humble golfer and an accomplished sailor.

Mark Friesen, CA – Chief Operating Officer. Mark brings to SEPPP a diverse background in being part of

leadership teams for high-growth small and medium-sized businesses, and brings experience in overseeing high-quality, client-focused solutions. In addition, Mark has specific experience in the financial services industry, serving as CFO and Managing Director for a US firm specializing in outsourced services to investment

partnerships, institutional investment platforms and discretionary managed accounts. Mark's financial knowledge as a Chartered Accountant, and his ability to analyze and understand individuals' potentially complex financial affairs provides a unique perspective to assist SEPPP's clients and their interactions with their accountants and existing financial advisors.

**1:45 pm – 3:45 pm – Thompson Room
Zahn Canada - Digital Denture Systems
with Kulzer**

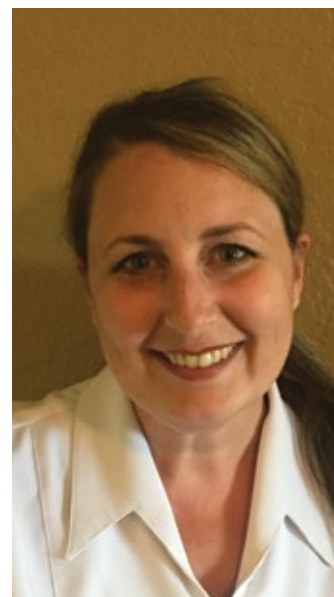

Speaker: Jennifer Gordon, DD

Outline: This session is an introduction to both of Kulzer's digital denture systems. We will overview the Pala digital denture system where a denture can be fitted and delivered in as little as two appointments and processed by Kulzer; and the Private Label solution, where a digital denture is made in a more traditional fashion and processed within the Denturist's own lab.

Bio: Jennifer graduated from GBC in 2008 and has continued to

pursue new technology and techniques in order to make fitting dentures a more precise and streamlined system. In July of 2016, she traveled to South Bend, IN to spend time at Kulzer's head office, training in their two digital denture techniques. This included scanning requirements for both model and bite blocks

and an impression technique with a built in Gothic arch tracing, prototype and wax try ins and how to do adjustments and lab finish a case. These techniques have been integrated into Jennifer's practice in the Niagara region resulting in fewer appointments, fewer adjustments and overall happier patients!

Please contact us with any questions at:

FRIDAY, SEPTEMBER 15TH

8:15 am – 10:00 am – Lillooet Room
Advanced DOMx Use
Speaker: Dean Fenwick

Outline: This course goes over less known but useful features in DOMx and ensures everyone has a full understanding of the recall features to ensure your business thrives and all patients get the care they need.

8:30 am – 12:00 pm – Fraser Room
WHMIS – Workplace Hazardous Materials Information System 2015
Speaker: Pat Evangelisto

Outline: This course has been customized for people who provide denture/dental services, highlighting products they use on a regular basis. We will discuss the health and safety hazards of these products along with ways the manufacturers recommend that workers be protected. Testing is mandatory under law, and a test will be conducted at the end of the program which complies with the legislation. Each participant will receive course material and a certificate of participation recognizing that they are trained as per the Occupational Health and Safety Act.

10:30 am – 12:00 pm – Thompson Room
Perspectives on Denture Occlusion; It's More Than Slapping Teeth Together
Speaker: Marc Wagenseil DD, CDT, VITA Global Trainer

Outline: Denturists are proficient in making dentures for patients. In fact, it is routine to produce several types of removable dentures and the outcome for the patient is most often successful but sometimes it is not. Why? Why do anterior teeth chip or pop-off, sores develop, patients communicate that they can't chew properly, or new dentures crack? Complications can especially be more so for implant retained dentures. Explore a fresh perspective on

occlusion and denture integration for the patient. Themes to be discussed are the costs of adjustments, freedom in centric, deflective contacts, natural chewing cycle, anterior overjet, sensitivity, and more. With a new understanding of biological and biomechanical principles in setting teeth you will learn how to minimize deflective contacts. Learning to use these techniques will consistently cut your adjustment rate in half and help eliminate post-delivery patient issues. Join Marc to renew your passion for dentures and rise above complacency. It truly is more than slapping teeth together.

Bio: Marc is a VITA Certified Global Trainer and in 2017 he celebrated 30 years in the dental industry working directly with patients and uniquely in the dental lab. He owns Heritage Denture Centre and Heritage Dental Lab in Edmonton, Alberta, Canada. Having trained extensively in Germany on theories, systems, and occlusion

concepts related to dentures and implant supported dentures, Marc has lectured and provided hands-on education internationally to dentists, denturists and dental technicians on occlusion, dentures and implant supported dentures. In addition, he provides consultation and advice to dental companies. Vita Germany authorized him as a Global Vita Trainer and Advocate. With his lectures, he inspires a unique awareness of occlusion, professional growth and the importance of denture integration in the body. Marc has dedicated himself to education, occlusion, and brings his clinical, intra-oral experience, varied knowledge, and passion for dentures to his lectures.

SATURDAY, SEPT. 16TH

1:30 pm – 4:30 pm – Fraser Room
Dentsply - You're Under a Rest
Speaker: Dr. Tyler Verhaeghe

Outline: A review of rest seat design and tooth preparations for Removable Partial Dentures. A clinical critique of rest seat preparations and tooth modifications using actual preparations as examples for discussion.

Bio: Dr. Tyler Verhaeghe is a Clinical Assistant Professor at the School of Dentistry at the University of Alberta. He is the lecturer and coordinator for the pre-clinical removable partial denture and complete denture prosthodontics courses in addition to clinical teaching and practice. With a Master in Health Sciences Education, his current research focuses on the use of technology in the education of removable prosthodontics. He co-authored an electronic textbook on complete dentures to the Apple iBooks Store in Fall 2016. He will be returning to school for graduate prosthodontics at UBC starting in Summer 2017. Tyler has lectured in Germany and has been on dental mission trips to Guatemala and Nicaragua.

1:45 pm – 3:45 pm – Lillooet Room
Pacific Blue Cross Open Table
Discussion – Dealing with Dental Insurance Plans
Speaker: Carlos Sorensen, Manager Claims Services, PBC

Outline: Bring your questions about procedure codes, preauthorizations and billing issues to the table for discussion. Great forum for your office staff.
